"Experience That Unites"

About *Us*

Portless boats are inflatable motorboats and yachts that perfectly meet the needs of day cruisers, while also being mobile, easy to transport, affordable, safe, easy to drive, and manufactured to a high standard.

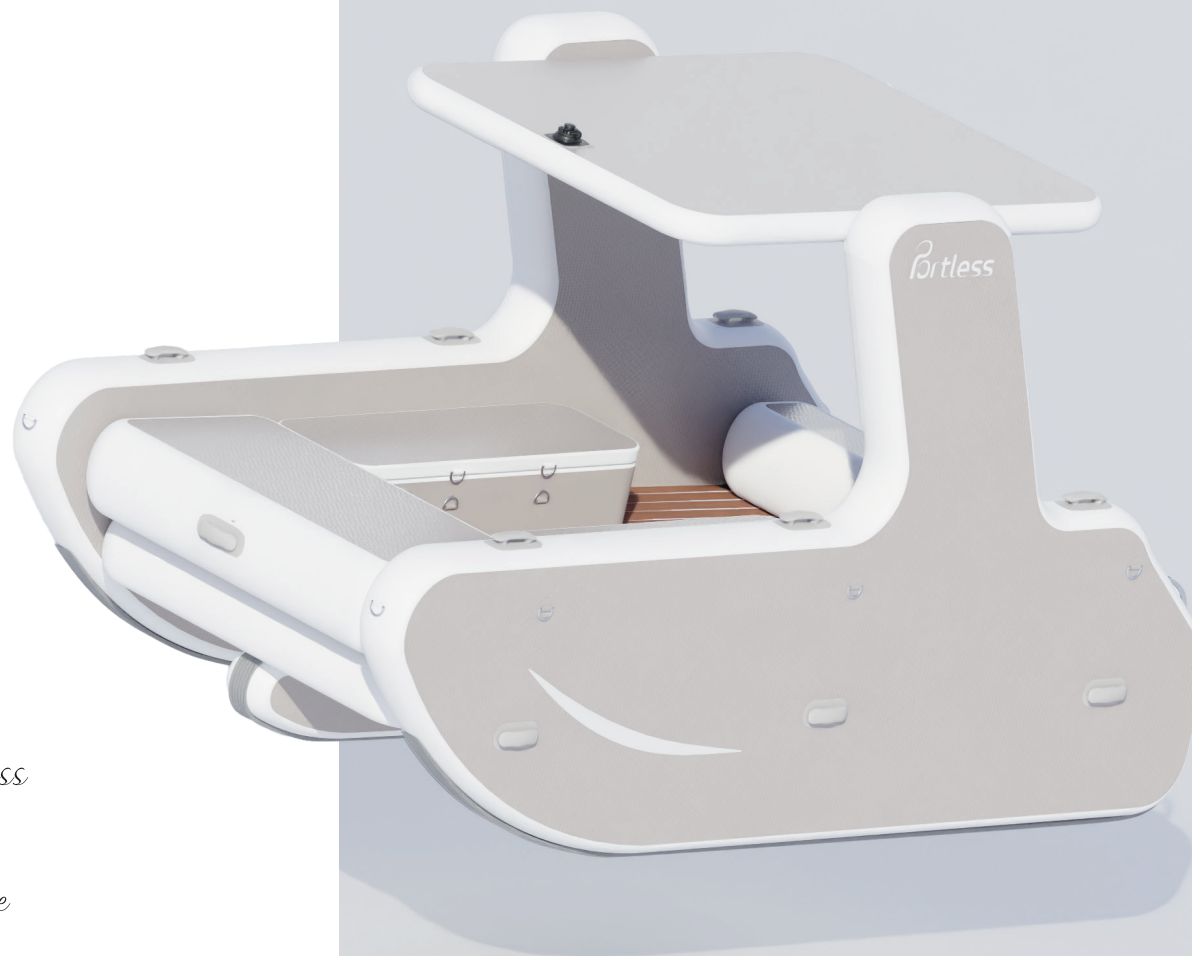

Portless International Ltd.'s goal is to enable everyone in the world to experience the joy of boating and the true taste of freedom.

Dinghy

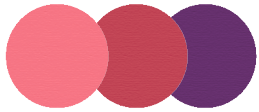

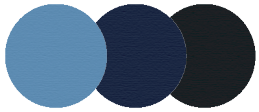

When designing the Portless Dinghy, the goal was to create a boat that was easy to transport, yet comfortable, with a deck spacious enough for four people.

A real breakthrough among caravanners and travellers.

Trinity

The Trinity was designed with a streamlined shape, an extended rear swim platform, and a two-level trimaran hull that offers generous space for up to six people.

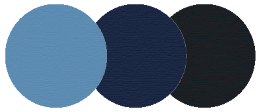

When deflated, the structure packs down small enough to fit into a larger car, making transport straightforward.

Once on the water, the large side windows let the wind flow freely through the cabin, ensuring easy handling even in rougher weather.

Lucy

The Portless Lucy features a two-level hull that offers sample space for up to ten people. Its twin-seat helm with integrated storage makes all-day cruising comfortable, while the trimaran hull ensures excellent stability. With the motor hidden, the rear swim platform remains safe to use even while underway.

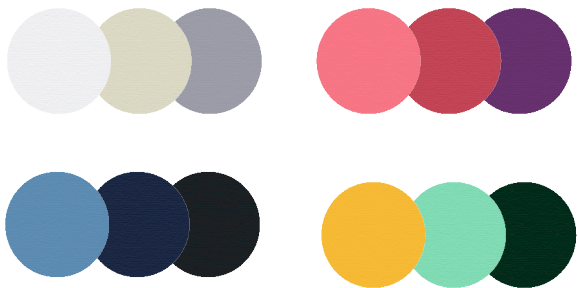

The inflatable seats with built-in storage, along with the lounge connected to the helm, provide comfort for up to ten passengers, and the flybridge can host four people sunbathing at once.

For a seamless handover, Portless International offers a full pickup-assemble-delivery service across Europe.

Ranzany

The Portless Ranzany owes its charismatic presence to more than its size. With its two-level deck and 12-meter length, it offers relaxed enjoyment for up to twelve people.

Propulsion comes from the custom-developed, proven hidden outboard motor integrated into the helm while dedicated spaces for a refrigerator, food, drinks, and even a toilet ensure comfort during full-day outings. At the stern, a large swim platform can be equipped with a dining setup or a sunbed on request. Despite its impressive dimensions, no special transport permit is needed – when deflated, it fits into a small truck.

For a seamless start, Portless International offers a full pickup-assemble-delivery service throughout Europe.
